

Policy Number: 2
Effective Date: 10/1991
Revised Date: 5/1/2019
Applicability: Eye Protection for Laboratories Policy

Purpose

To protect faculty, staff and students from injuries to the eye caused by materials used in the laboratory.

Policy

All individuals working in a laboratory will comply with the use of safety glasses or safety goggles while working with or near chemicals, gases or powders or while using power equipment such as saws, lathes and grinders.

All individuals working with lasers will have the appropriate laser safety glasses for the wavelength in use.

All welders will have the appropriate shade of protection for the welding operation.
