

Policy Number: 8
Effective Date: 10/1991
Revised Date: 5/1/19
Applicability: Lockout/Tagout The Control of Hazardous Energy Policy

Purpose

To ensure each operation prevents the accidental energization of equipment while undergoing maintenance. Lockout Tagout applies to securing any force where energy whether electrical, hydraulic, gas or mechanical may cause injury if accidentally engaged.

Policy

Each individual working on equipment must follow the guidelines of Lockout Tagout as established by the Occupational Safety and Health Administration (OSHA).

Equipment that is locked out of use must have a tag that provides the name and phone number of the individual locking out the equipment.

For additional information refer to the Lockout Tagout Program.
