

# Confined Space

The purpose of the Confined Space Entry Program is to protect employees from those hazards of entry into and work within confined spaces and to ensure that all activities requiring entry into a confined space are conducted in a manner consistent with Lehigh University's procedures and OSHA 29 CFR 1910.146 (General Industry) and OSHA 29 CFR 1926 (Construction).

The *Permit-Required Confined Space Program* includes the following:

- Safe entry procedures
- Required equipment and training
- The evaluation of confined spaces
- Responsibilities of department/supervisors/employees
- Confined Space Permits

Confined Space training is available online at the Environmental Health and Safety website.
